Bio Huma Netics, Inc. Welcomes Shawn Whitmer as Director of Probiotic Solutions®

Gilbert, Arizona (April 16, 2013) Bio Huma Netics, Inc. (BHN) is proud to name Shawn Whitmer, PE as its new Director of Engineering and Probiotic Solutions®. Shawn is responsible for managing Probiotic Solutions® wastewater treatment product line sales and growth efforts, working closely with Sales, Marketing and Operations staff. Shawn Whitmer joined BHN on April 1, 2013. Shawn commented on his goals for Probiotic Solutions, “We intend to build on the past 25 years of success of Probiotics Solutions® products domestically by strengthening our established product representatives and developing new relationships both domestically and internationally so that more communities’ wastewater treatment and/or environmental bioremediation needs are meet.”

Shawn Whitmer has over four and half years experience as a Principal at the following engineering firms: ADVantage Consulting Services, Bowman Consulting and VANTAGE Resources, LLC. As a Principal, Shawn oversaw and managed a variety of public works projects. They included municipal water wastewater and roadway projects, mining projects, natural gas pipeline projects. Shawn also managed projects including: water and wastewater master planning, regional water and sewer lines, potable water wells, reservoirs, pump stations, wastewater lift stations, water and wastewater treatment facility design and construction oversight. Some of his specialties include water and wastewater complete system planning, modeling, design & construction. Shawn has over fifteen years of experience in the water and wastewater engineering industry with 12 years of project management experience.

Shawn graduated from Arizona State University with a double Bachelor’s degree in Civil Engineering and Spanish. Shawn then earned a Masters in Civil and Environmental Engineering from Arizona State University.

About Bio Huma Netics, Inc.

Founded in 1973 and headquartered in Gilbert, Arizona, Bio Huma Netics, Inc. (BHN) claims the uniqueness of “complexing” a very small – highly refined liquid carbon nano-sized molecules to nutrients. This process called Micro Carbon Technology™ (MCT) makes BHN’s liquid plant nutrition and specialty products much more effective and efficient than any other plant nutrient sources on the market. BHN offers over 70 sustainable solutions designed to increase the efficiency and productivity for agriculture with HUMA GRO®, turf & ornamentals with HUMA GRO® TURF, wastewater treatment and environmental applications with Probiotic Solutions®. BHN also offers sustainable Smart SystemsSM technology solutions from its company Opus-Prime™. www.BHN.us

Probiotic Solutions® wastewater remediation products stimulate microbial activity to reduce sludge, cut down on odor, control BOD’s/COD’s and Fat, Oil, Grease (FOG) levels. www.Probiotic.com
