

# BHN products

2014 Ag Season in Greece

***INTRACHEM HELLAS LTD***

- As a result of few years' efforts, Huma Gro Copper is gaining ground in comparison to the rest of BHN products.
- Huma Gro Copper is accepted by the farmers as a good nutritional product, but mostly as an additive to commonly used fungicides.
- Formulations of Fosetyl-Al, Strobilurin, Triazole and copper compounds are greatly benefited by the help of Huma Gro Copper in tank mixing application.

# Huma Gro COPPER

- Super Phos is running along with various phosphates (foliars).
- Competition is tough but at the end of the game, it is the winner.
- As a foliar or ground applied phosphorous is really exceptional, particularly on alkaline soils.

# **SUPER PHOS**

- Breakout is doing several jobs when applied to the plants in pre bloom sprayings.
- Richer blossoming, better fruit setting and on cotton it comes second only to itself!!!

**BREAKOUT**

Huma Gro Copper and Sulfur mixture should be registered as the best preventive and curative powder mildew fungicide (we understand that it takes time and money??)

**Huma Gro COPPER + SULFUR**

- Tank mixture of SUPER K and FULVI PRO (Greek formula) is hard to explain.

**TRY TO UNDERSTAND IT YOURSELVES  
FROM THE ACCOMPANYING PICTURES!!**

**After a 1 and ½ year from time of application,  
size of fruits and density of foliage is  
remarkable!!**

**SUPER K + FULVI PRO**

**UNTREATED**

***SAME TREE***

**TREATED (100 CC SUPER K  
- 100 CC FULVI PRO /  
100 L WATER VOLUME)**

**TREATED**

**UNTREATED**

Untreated

100 cc Faldi Pro

100 cc Super K

100 Liter Water

5-10 Liters  
per tree

- Last but not least, the exceptional mixture of Jackpot + Huma Gro Calcium:

- It really helps the cotton grower to obtain record yields!!!

**JACKPOT +  
Huma Gro CALCIUM**

**Thank you  
for the excellent cooperation!**
