# ***BHN Mission Statement***

To provide **ecologically sustainable** products and services that **replenish** the earth by **restoring** water quality, **reviving** soil fertility, **renewing** food and fiber value, and **refocusing** engineered technologies; while **reducing** human environmental impact thereby **enhancing** the quality of life for all living beings.

# *Operating Principles*

- PEOPLE FIRST:

Our relationships take first priority where each individual is highly important to our combined success. Honor and recognition are given to those who contribute and our greatest measure of success will be judged by the quality of the relationships we develop.

- INTEGRITY THROUGHOUT:

Integrity symbolizes a wholeness or unity in purpose in all facets of the business and should exist throughout the organization . The means used to obtain a good end must be just as good as the end itself.

# *Operating Principles*

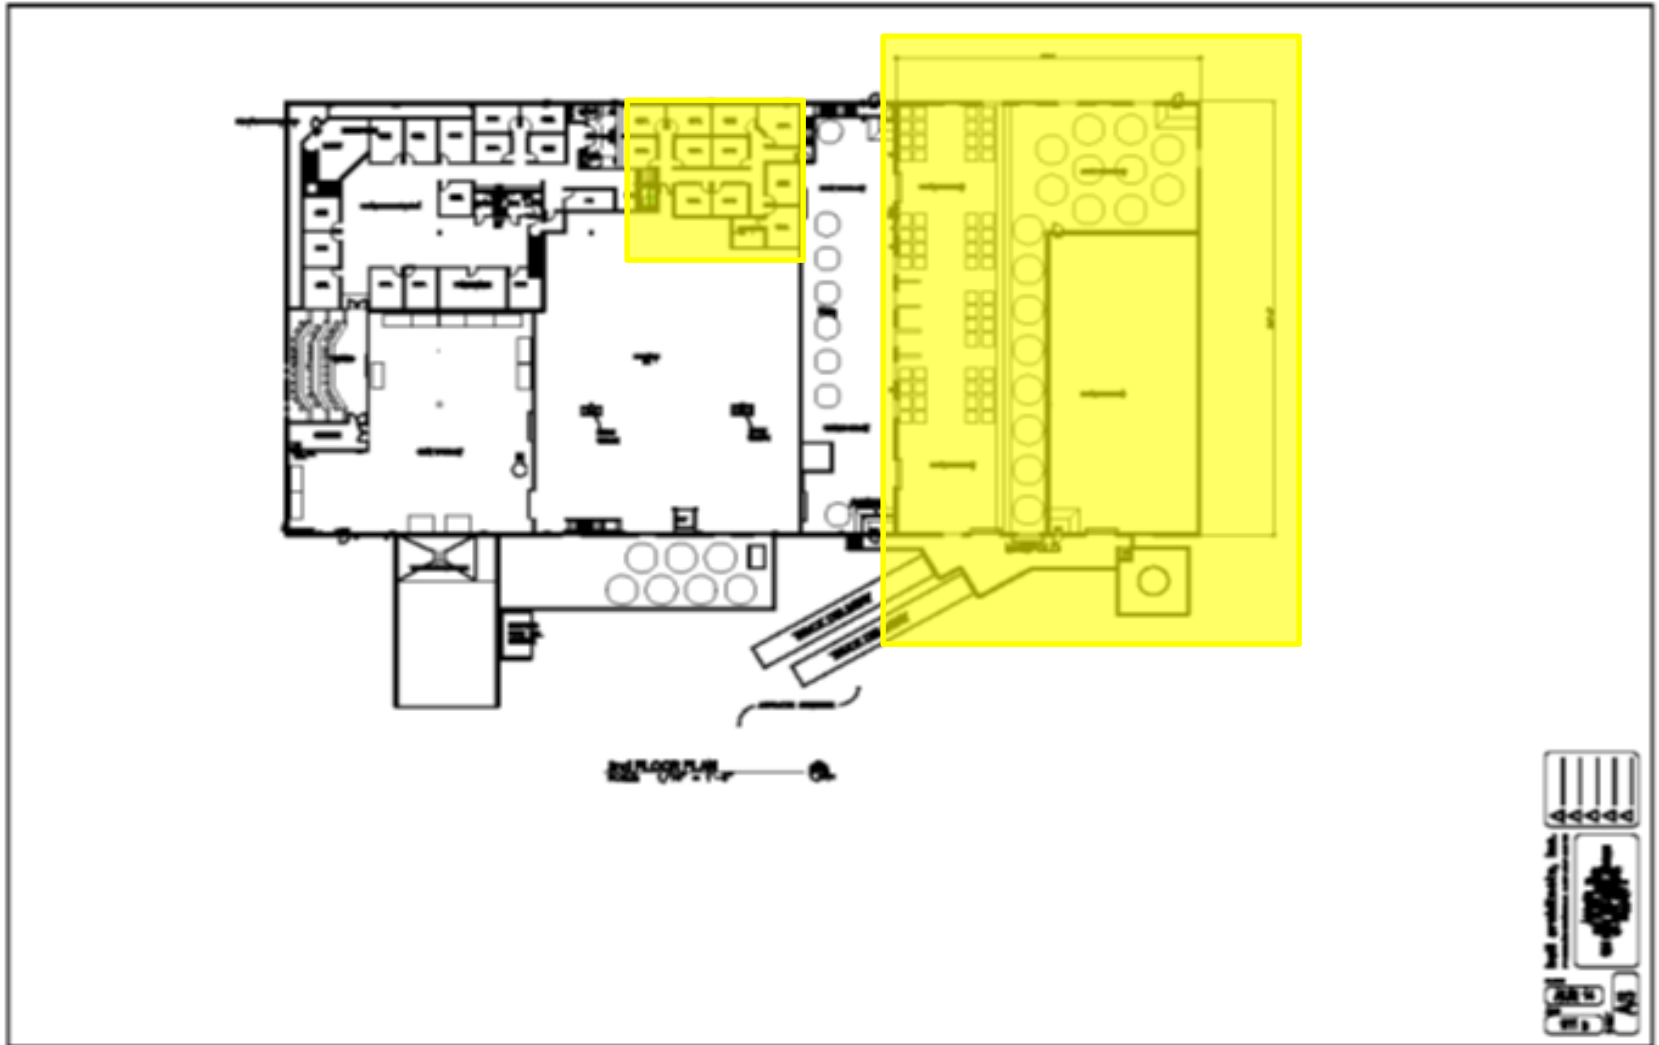

- ABUNDANCE MENTALITY:

An abundance mentality creates a feeling of respect where there is plenty to go around and everyone can share the harvest. The law of the harvest prevails causing us to reap that which we sow.

- WIN/WIN AGREEMENTS:

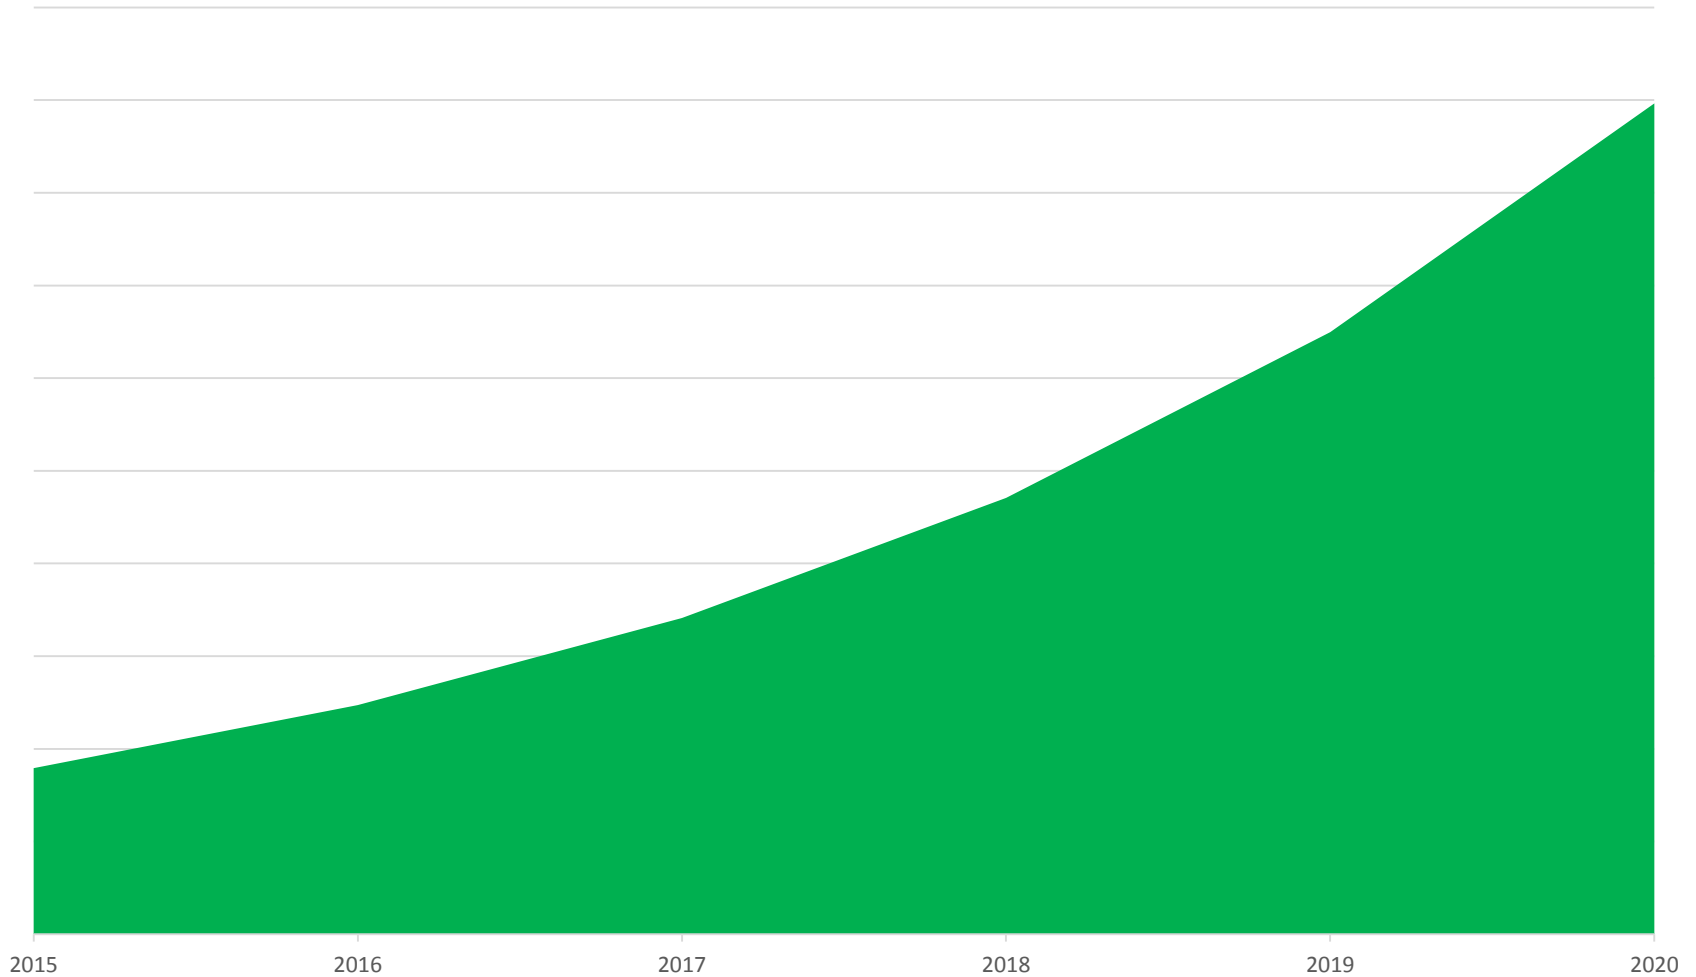

Win/win occurs when all participants honestly strive toward mutual success. Here we seek for synergistic solutions where the results are greater than the sum of the separate propositions. Neither party to an agreement can expect a something for nothing result or else no deal may be the best option.
